

Adjust Quotes in Akolades

Your Revit Schedule has now created an Akolades Project which is comprised of a series of quotes.

Status will say "Pending Import" at first, show a loading bar, and then "Complete" when done.

[image.png](#)

Once complete, you can enter each quote and edit as with any quote in Akolades.

Please be sure to verify all dimensions.

You can now make any changes you wish, add options and comments as needed.

Revision #2
